

Employer Review Pack

H. Omer Aktas - documents and links for quick casino role review

CV + brief + profile
CasinoOpsAI.com
Role discussion path

How to use this pack

This pack is for owners, GMs, HR, recruiters and operations directors who want to review my background without searching through the full website first. Start with the CV for work history, then the hiring brief for the plain value summary, then the executive profile if you want the role-fit angle.

1. CV / Work History Use this for role comparison: dates, titles, casinos, countries, departments and responsibilities.	2. Hiring Manager Brief Use this for a fast internal summary: why the site exists and why a conversation may make sense.
3. Executive Profile Use this for the hybrid position: casino operations experience plus reporting, SOP, systems and practical AI workflow ability.	4. Role Discussion Use the contact page when the role, department problem or first 90-day need is clear enough to discuss.

Main positioning

Casino operations first. Practical reporting and AI support second. The goal is cleaner casino output: better reports, stronger handovers, clearer SOPs, safer workflows and management-ready information.

I am open to the right full-time, interim or contract-to-hire casino role where that combination can create value.
